

Joffrey Joumaa

Driving Innovation with Data & Analytics

Summary

Data-driven and innovative professional with 8+ years of experience in industry and academia.

- Driving the efforts of a cross-functional team of 10 professionals across 4 countries
- Transforming unstructured data into actionable insights, through ontology and knowledge graph development
- Evangelizing data contracts to support data management strategy
- Developing a graphRAG-based chat application as a proof of concept

I am combining strategic vision with technical expertise to drive impactful outcomes.

Experience

2023 -	Product Owner – NOVO NORDISK (Pharma) → Managing backlog and engaging 20+ stakeholders for digital transformation → Knowledge graph, data contract, standardized ontology-based terminology Semantic Engineer → Automation, pipelines and knowledge graphs CI/CD (AWS, ADO, Python) → Ensured project continuity by temporarily assuming PO responsibilities	DK
2021 - 2023 (20 months)	Data Scientist – UCSC (Ecology) → Turned motion sensors information into valuable marine ecology research → Web app, R package, Classification, Containerization (Git, R, Python, Docker)	US
2020 - 2021 (17 months)	Data Scientist – THEGREENDATA (FinTech) → Time Series Forecasting, Classification, Monte-Carlo simulation (Git, Python) → Web app (Git, Shiny, Dash/Plotly)	FR
2018 - 2020 (17 months)	Data Consultant – SÆGUS (Consulting) Data Scientist – GROUPAMA (Insurance) → Leverage data to improve customer experience (Spark, Dataiku) → Conversion rate models (Python, Dataiku) Tableau Practice Lead - BOLLORÉ LOGISTICS (Transport) → Support & Expertise with Tableau (Desktop, Prep and Server) → Creation of a Data Vizualisation pole Data Analyst – L'ORÉAL (BeautyTech) → Creation, maintenance & support of data viz (Domo) → Worldwide context (> 3500 users, 64 countries)	FR
2018 (4 months)	Biostatistician – IT&M STATS (Consulting) Biostatistician - Da Volterra (Pharma) → Statistical analysis for 16S metagenomic data → Management of subcontracting analyses	FR
2017-2018 (7 months)	Data Analyst – MALAKOFF MÉDÉRIC (Insurance) → Customer call reminder segmentation - « Customer Services » Department → Text Mining (Topic Modeling, Regular Expression, Cloudword)	FR
2016–2017	Gap year → Writing Scientific Papers & Postdoc Projects, MOOCs	FR
2013–2016 (38 months)	PhD – CNRS (Ecology) • Regression (Logistic, Linear, Additive, etc.) • Classification (Random Forest, K-means, KNN, SVM, etc.) • Statistics (Multivariate Analysis, PCA, etc.) • Signal Processing (Spectral Estimation, Signal Filtering)	FR & UK

Education

2013–2016 PhD in Quantitative Ecology

University of La Rochelle, La Rochelle, France
